COMPANY INTRO

EST. 1986

Athens Research & Technology (ART) is a global leader in the precise purification of native human and animal proteins. Our proteins are unmatched in both quality and purity—empowering research and life science product manufacturers around the world.

Our Mission

People, Purpose and Proteins Fuel Our Passion.

People: We attract remarkable talent to our lab, developing the next generation of protein chemists.

Purpose: We work to foster a curious, creative, and self-directed team ensuring our viability as an employer and good stewardship of our community

Proteins: We ensure high-quality proteins vital for academic research and reliable diagnostics.

WHO WE ARE

At ART, we are committed to supporting scientific progress and dedicated to finding optimal solutions for our customers worldwide. Since our inception in 1986 at the University of Georgia (UGA), we continue to proudly support the life sciences industry globally in the advancement of essential medical research, diagnostics, and therapies.

WHAT WE DO

In the ART lab, we prioritize accuracy and reliability in all aspects of our operations. From sourcing the finest starting materials to implementing advanced purification techniques, we leave no stone unturned in our quest to deliver the best-quality protein products.

Our commitment to excellence ensures that researchers and manufacturers can trust in our solutions for their critical research, diagnostics, and product development needs.
